PUBLICATIONS

L'Astronave Diroccata – History of the Pergolo Area, by Vitantonio DELL'ERBA and Pietro Andrea ANNICELLI – published by Nuova Editrice Apulia (1996).

TEACHING ACTIVITIES

With the Municipality of Noci (BA), he has taught n. 9 (nine) hours aiming at training attendants to the notice-competitive exam for Local Police Officers of the Municipality of Noci (BA), with the following content: *aventi ad oggetto: “The D.P.R. n. 380/01 and further modifications and integrations: The various qualification permits and the sanction system of unauthorized building”*.

ORGANIZATION DESCRIPTION OF THE STRUCTURE.

Engineer *Vitantonio DELL'ERBA* owns a professional studio developing its activity in the sector of civil – building engineering of the territory, in the territorial project, in town building, architecture and building, in the project and implementation of Public Works, as well as in the advice with and on behalf of Boards.

The activity of the professional studio covers a wide range of actions in the sectors of engineering, architecture and town project so that it can offer a real integrated project enabling the control of the implementation of a work.

For this aim the studio avails itself of the internal collaboration of qualified staff (n. 3 civil engineers + n. 1 electrical engineer) that interact with a C.A.D. (Computer Aided Design) networked system allowing the automatic management of maps, drawings, patterns, the drafting of Safety and Coordination Plans (PSC), Safety Plans (POS), Risk Evaluation and Scaffolding Assembly, Use and Dismantling Plans, construction site price-accounting list (PRIMUS) etc., processing of structural calculations of multifloor buildings (LOGICAL SOFTWARE), static and technical-administrative testing, Fire Brigade dossier, etc., project of electrical, heating, air conditioning and alarm plants, etc.; the structure avails itself of external professional collaborations for the completion of work loads.

This technological development allows the acceleration of the drafting and diagramming processes of the projects both in urban and building construction scale.
